

YOUR PRINT GUIDE

Everything you need to get your portrait beautifully printed and on your wall.

FLUFFYFRIENDS.ONLINE

Your Files

Your download includes two files. You can use either one — or both:

File	Format	Best for	Max print size
Landscape	Wide (16:9)	Mantle, sideboard, wide frames	65 x 36 cm / 25 x 14 in
Portrait	Tall (2:3)	Staircase wall, narrow frames	22 x 31 cm / A4 size

Good to know: Your files are high resolution — sharp enough to print poster-sized without losing detail. Do not compress or resize them before sending to a printer.

Print Specifications

These are the exact specifications for your portrait files. Share these with your printer if they ask for technical details.

File specifications:

Specification	Landscape file	Portrait file
Image area	16.0 x 10.0 in (406 x 254 mm)	8.5 x 12.0 in (216 x 305 mm)
Full bleed	16.25 x 10.25 in (413 x 260 mm)	8.75 x 12.25 in (222 x 311 mm)
Bleed allowance	0.125 in (3.2 mm) all sides	0.125 in (3.2 mm) all sides
Safe zone	15 mm from all edges	15 mm from all edges
Resolution	300 DPI minimum	300 DPI minimum
Colour profile	sRGB	sRGB
File format	JPG	JPG
Paper weight	200–300 GSM recommended	200–300 GSM recommended
Print process	Giclée fine art print	Giclée fine art print

Paper sizes compared:

Size	Centimetres	Inches	Best for
A4	21 x 29.7 cm	8.3 x 11.7 in	Portrait format — starter size
A3	29.7 x 42 cm	11.7 x 16.5 in	Portrait format — great wall presence
8 x 10 in	20.3 x 25.4 cm	8 x 10 in	Portrait format — standard photo size
16 x 20 in	40.6 x 50.8 cm	16 x 20 in	Landscape format — perfect fit
50 x 28 cm	50 x 28 cm	19.7 x 11 in	Landscape format — mantle / shelf
65 x 36 cm	65 x 36 cm	25.6 x 14.2 in	Landscape format — maximum size

What is bleed? Bleed is a small extra border around your image. Printers trim the paper after printing — the bleed ensures no white edges appear if the cut is slightly off. Your files already include the correct bleed. Send them as-is.

Option 1 — Local Print Shop

The easiest option. Walk in, hand over your file, pick up your print. Most cities have a print shop within a short distance — photo labs, copy centres, and office supply stores all offer this service.

What to do:

1. Save your landscape or portrait file to a USB drive or your phone.
2. Walk into any print shop — Staples, Office Depot, a local photo lab, or similar.
3. Ask for a 'photo print' or 'poster print' on photo paper.
4. Tell them the size you want (see size table on page 2).
5. Pick it up — usually same day or next day.

Paper to ask for:

Glossy — Rich, vivid colours. Great for bold themes like King or Queen.

Matte — Softer finish, no glare. Works well in bright rooms.

Lustre / satin — The middle ground — slightly sheen. Most popular for pet portraits.

Email template — copy and send:

Hi,

I would like to print a high-resolution photo portrait.
I am attaching the file — please do not resize or compress it.

File format: JPG

Print size: [e.g. A3 / 50x28cm / 16x20in]

Paper: Lustre or satin photo paper, 200–300 GSM

Resolution: 300 DPI — please print at original resolution

Quantity: 1

Please let me know the cost and turnaround time. Thank you!

Option 2 — Online Printer

Great if you want more size options or prefer delivery to your door. Most offer professional quality at very reasonable prices.

Recommended services:

Snapfish ([snapfish.com](https://www.snapfish.com))

Easy to use, good quality, fast delivery. Great for standard photo prints and posters.

Printful ([printful.com](https://www.printful.com))

Higher end. Good for large format and canvas. Ships internationally.

Pixartprinting ([pixartprinting.com](https://www.pixartprinting.com))

Professional quality, wide range of sizes and paper types. Used by designers.

Local pharmacy / supermarket kiosk

Quick and affordable for A4 and A3 sizes.

How to order online:

1. Go to the site and find 'Photo Print' or 'Poster Print'.
2. Upload your file — use the highest quality setting available.
3. Select your size from the table on page 2.
4. Choose lustre, satin, or glossy paper finish.
5. Checkout — delivery usually 3–5 business days.

Option 3 — Canvas and Framed Prints

For the most impressive wall display, canvas and framed prints take your portrait to another level. These look extraordinary — especially the royal themes. They make incredible gifts too.

Canvas prints:

- Printed on stretched fabric, mounted on a wooden frame — ready to hang, no separate frame needed.
- Best size for landscape: 50x28 cm or 60x34 cm.
- Best size for portrait format: 30x40 cm or A3.
- Services: Canvaspop, Printful, or any local canvas print shop.
- Ask for a 'mirror wrap' — this folds the image around the frame edges cleanly.
- Standard canvas depth: 1.5 inches (38 mm). Wood depth: 1.3 inches (33 mm).

Framed prints:

- Print first (Option 1 or 2), then frame separately — or order a ready-framed print online.
- Dark wood or black metal frames — best for Royal and Samurai themes.
- Light wood or white frames — best for Vet, Pilot, and Admiral themes.
- IKEA RIBBA frames are an excellent affordable option — available in A3 and A4.
- For landscape format, a panoramic frame (50x28 cm) creates a cinematic look.

One last thing: Your portrait is print-ready straight from your download. There is nothing to edit or adjust. Just send the file as-is and let the printer do the rest.
